Britain Cannot Avoid War By Shunning Pacts States Conference Envoy

Skipton, England.—Striking back at the government's critics who picture the Locarno pact as a net dragging Great Britain into a European war, Captain Anthony Eden warned that if Britain fears to discharge her responsibilities "she shall invite the disaster which will follow."

The under-secretary for foreign affairs said he regretted that his government at the moment was in conference in Geneva, added that Great Britain is the sole judge whether she goes to war.

"Some people seem to imagine that if we signed some means of escape from what they are pleased to call the commitments of Locarno, we should be less likely to be involved in a European war," Captain Eden went on.

"The very opposite is the truth."

"Even a power so geographically remote from Europe as the United States became involved in the Great War."

"Certainly we cannot avoid another war by saying that under no circumstances will we go to the aid of a power unluckily attacked."

Great Britain, he said, alone is the power which goes to war under the Locarno pact and as a member of the League of Nations cannot in which a unanimous decision is required.

Although Germany has left the disarmament conference, the under-secretary continued, "the British government is determined the work shall go on."

Denying charges that the government is not wholly for disarmament, he said no delegation had worked harder in the Geneva parleys than the British.

The Locarno pact, he held, was one of the most effective instruments for peace in western Europe, and, therefore, it would be more unfortunate that a campaign should have been launched against it.

Drop in Wheat Exports

Last Week in October Shows Decrease in Canadian Wheat Exports.

OTTAWA, Oct. 21.—Exports of more than 1,500,000 bushels was shown in export clearances of wheat for the week ending October 27 as compared with the previous week, and declines of 1,000,000 and 1,000,000 bushels respectively.

Against the corresponding week of last year, according to a report issued by the Dominion Bureau of Statistics.

During the week ending October 27, export clearances of wheat totalled 1,037,400 bushels, compared with 5,877,000 in the previous week.

Canadian wheat in store on October 27 totalled 249,502,238 bushels, compared with 246,232,584 the week before, and 250,269,967 on the corresponding date of 1922.

Navigation Closing Early

SMITHFIELD, N.B.—The early closing of an early closing of navigation on the Great Lakes is seen here by marine men. Most of the ore and grain carriers on their last trips and on November 3 the last of the Pittsburg line steamers to operate on the upper lakes this year passed through, down-bound.

Duke of Athol Summoned

Charge For Violation Of Letters Act Creates Sensation In London

London, Eng.—A summons was granted in Bow Street police court against the Duke of Athol for violation of the letters patent act, which creates a sensation in England.

The duke raised his own private "mystery fund" of more than £150,000 by voluntary subscriptions and then spent £748 gifts ranging from £2,000 to £100.

The duke set aside £60,000 for charities and distributed £36,000 among the subscribers, who bought tickets after the manner of the Irish sweepstakes.

The lucky subscribers to the Duke's

lottery received Oct. 21. Afterward men from Scotland Yard held a conference with the duke at his London residence.

The case will be heard in the Bow Street court, Nov. 14.

Doctors Resign

Eleven Members Of Honorary Staff Of Whinlipp Hospital Differ Over Relief Policy

Winnipeg, Man.—Eleven doctors, the honorary staff of Victoria Hospital, who have signed the resignation to the board of directors a month ago, have resigned. It was announced by Dr. E. S. Moorhead, chairman of the joint committee of the Manitoba Medical Association and the Whinlipp Medical Society.

The resignations declared the doctors were not in accord with the directors on the policy laid down in patients on relief. It was contended in other Winniperg hospitals the honorary staff attended only emergency relief cases, whereas at Victoria hospital, members of the honorary staff administered to all relief patients.

Withdraws Troops In North

Japan's Action May Be Due To Strained Relations With Russia

Peking, China.—Japan's sudden and complete withdrawal of troops from the North China demarcation line, announced yesterday, has been observed by those who pointed to strained relations between Japan and Russia as a possible reason.

A full Japanese division, following the terms of the Tangku truce, will be available for action against the Soviets in case of war.

Importance also was attached to Japan's withdrawal of Chinese troops to bring artillery and machine guns into the zone to fight bands, for a military body was constituted thereby capable of controlling the area.

Report Not Confirmed

Winnipeg, Man.—Reports current here said universities of Manitoba, Saskatchewan, Alberta and British Columbia each would receive a \$500,000 grant from the Canadian foundation. No confirmation of the report could be obtained here.

White House Conference Continues Negotiations On British War Debt

Washington.—A continuation of negotiations on the British war debt was decided on at a White House conference in which the chief British and United States spokesmen talked with President Roosevelt.

The discussions in progress nearly a month, have failed to produce any definite achievements and it had been intimated that the British were growing restless and thought of bringing them to a conclusion.

The discussions had been held before the president at a meeting lasting an hour and a half. At its conclusion the White House said:

"This was a conference on the subject of the debt settlement—a continuation of the discussion. The discussion will be continued. There was nothing at all final. So far as gold purchases in England are concerned that subject was not brought into the discussions."

Those who talked with the president were Sir Frederick Leith-Ross,

special representative of the British treasury; Ambassador Sir Ronald Munro, and Under-Secretary Dean Atherton of the treasury; chief American representative in the conversations.

At the outset of the negotiations, the Americans were not able to bring from them any concrete accomplishments. They have been confronted with the task of compromising the opposite viewpoints of a popular British public, which demands that the war debts be wiped out, and an independent and congressional insistence that the installments be paid in full.

The British debt now totals approximately \$4,000,000,000. With interest added, payments of more than £100,000,000 are scheduled for the next 51 years under the funding agreement now in effect.

Acheson said after the White House conference that a meeting of the debt negotiators had been arranged for November 15, and that he expected the discussions to go on for a considerable period.

SPEED IS DECEPTIVE ACCORDING TO RECORDING OF CAMERA

Princess Royal Travels by Train

MONTREAL, Quebec.—Royal Canadian Mounted Police have strengthened out-door details of what was described as their paralyzing blow to the liquor smuggling ring and prepared for what is expected to be a wholesale prosecution of rum-runners.

Seize last Sunday of documents used to incriminate 533 persons in illegal transportation between the unincorporated areas of Pointe-aux-Petits-Cheneaux and St. Lawrence coast towns in Quebec brought to a climax weeks of intense investigation into the activities of rum-runners.

Simultaneously, a series of raids

on "headquarters" in the towns of Matane, Riviere Du Loup, Bic and St. Francois Du Lac, while several liquor-laden vessels—including the river boat "Skipper" and No. 12—were seized.

It is anticipated the leader of the ring was being detained at Downing Street and that several other arrests were imminent.

Has Own Recovery Plan

Lethbridge Would Need Interest Loan From Governments

LETHBRIDGE, Alberta.—Lethbridge will launch its own recovery program if the provincial and federal governments will grant it a loan of £500,000, interest free, for nine years.

If granted, the city will build a new city hall, a new central fire hall, undertake an extensive paving program, build a new waterworks plant and improve the city's playing fields.

In return, for the interest-free loan the city will pay the full cost of the labor involved in the undertakings. In addition, the city will charge extra rent along into the undertaking the married men now receiving direct relief, costing the city about £100,000 a year and the two governments another £100,000.

Extending Mail Service

Airplane To Carry Mail To Remote North Districts

OTTAWA, Oct. 21.—The post office department contemplates two extensions to its existing service down the Mackenzie River, the first being the carrying of air mail to Caniapiscau River, about 35 miles from Cameron Bay, the principal settlement in Great Bear Lake, while the other will reach out to the shores of the Arctic Ocean 1,000 miles north of the Mackenzie. First flights will be made in 1934.

"First flight, 'greatest' eagerly

first" after by philatelists, will be taken out by the post office department.

The post offices at Caniapiscau Bay and Coppermine. These are special air mail stamps.

Grain Rates Reduced

Canadian Railways Announces New Price For Winter Shipments

MONTREAL, Quebec.—Canadian railways will reduce grain rates between Georgian Bay ports and Canadian Atlantic ports by 2.6 cents per bushel as compared to last winter's rates, effective Nov. 1, said George Stephen, vice-president of the Canadian Pacific Railway, stated here.

The reduction is being made to meet competition of British and American railways operating between Buffalo and New York, he said.

The reduction will be effective

in the province could be brought back to a full winter's rate.

At a recent meeting of mining

executives, he said, would make an embargo would be placed on coal

Ambitious Plan To Construct Ocean Airports To Facilitate Air Travel Across Atlantic

Long the blue-printed dream of an imaginative inventor and his associates, construction of a chain of a seadrome ocean docks across the Atlantic may soon become a reality under the NIHAs.

The Seadrome Dock Corporation, organized to translate into reality the plans of E. R. Armstrong, the seadrome inventor, has applied to the Federal Public Works Administration for a \$30,000,000 loan for the construction.

Claiming its revolutionary project is now a feasible and practical venture, the Seadrome Corporation asserts granting of the loan would put 10,000 men back to work in 30 days, and would create a demand for 125,000 men.

The seadrome, or floating ocean airport, was first conceived by Armstrong in 1918, while he was striving to develop some method for trans-oceanic air travel. Under present plans the seadromes would be situated in the ocean in the harbors of about 450 miles to provide safe landing spaces for planes.

An open work structure of iron and steel, 1,000 feet long, 125 feet in length and about 800 feet wide, its principal characteristic is a huge aeroplane landing deck, rectangular in shape with narrow ends, much like that of the landing deck of a naval aeroplane.

These floating tanks would maintain the landing deck on even keel 100 feet above the waterline while the gigantic seadrome itself remains hitched to the ocean bed by steel cables anchored in a 1,500-ton reinforced concrete anchor.

Because of its openwork girder construction, sponsors claim the seadromes can withstand the buffeting of huge ocean waves which they explain will pass through the streamlined understructure without breaking.

Beneath the huge landing deck where aeroplanes will come to rest and take off, there will be service hangars, repair shops, wireless, telephone, radio equipment, beacon lights and modern hotels. Passengers will be able to stop overnight at the seadromes hidden in the middle of the ocean, and there will be palatial restaurants, shops, beauty parlors, theaters and gymnasiums. The seadromes will also have stock exchange branches and even fishing facilities.

Use of the seadromes, according to its proponents, will not only eliminate practically every vestige of danger and chance from trans-oceanic flying but will make the Atlantic crossing a matter of only 30 hours at the most.

Each seadrome, a world's record, weighs 62,000 tons, and will cost an estimated \$6,000,000. Each will be manned by a resident personnel of about 125 and a floating payroll of between 300 and 400 men.

The first seadrome would be anchored in the ocean about 375 miles east of New York city. Three others would be built at intervals of 470 miles in a line from the Azores to the coast of Spain.

Seadromes anchored in the gulf stream, which is equivalent to the semi-tropical latitude of Bermuda and the Azores, are expected to prove popular summer resorts.

In applying for the NIHAs loan, the corporation set forth that the seadrome project will be selfliquidating as a result of revenue expected from the sale of food and services from the seadrome trans-Atlantic airlines expected to patronize the seadromes.

It is further pointed out that no federal state, national or local taxes are involved, while the \$30,000,000 loan which would completely revalorize ocean travel and place Europe only 30 hours away by air, is much less than the cost of even one ship.

The seadromes will be constructed in sections, probably in ship-building yards at Philadelphia and Chester, Pa., towed to the Delaware breakwater for assembly, and from there to their final resting place in the Atlantic.

Discover Lost Tribe

Discoveries of a "lost tribe" in the Hunanaya mountains in 1931, Dr. Jill Constance Ball, author of "The Lost Tribe" and Dr. Irene Baird, author of "The Lost Tribe," made up of about 100 people live at an altitude of between 23,000 and 25,000 feet, have caused an agricultural products obtained from the valleys below, and still retain characteristics of an ancient civilization, they stated.

Great Increase Noted

Appendicitis Causes Many Deaths

Dr. Hanford McKeever, clinical professor of ophthalmology, at McGill University, Montreal, told the Post-Graduate Medical Association of North America, at Cleveland, Ohio, that kidney diseases sometimes affect the eyes, immediately in such a manner as to destroy the sight.

Appendicitis, Dr. George P. Moore of the University of Pennsylvania, "has become as common as 20,000 young people die each year in the United States because of it. You younger people, I mean an average age of 25, are most liable to appendicitis," he said.

Appendicitis is a disease that kills many, but it is not fatal, Dr. Muller added, it is not known.

Seven years ago pernicious anemia was "absolutely fatal," but now, says Dr. Cyrus C. Sturgis of the University of Michigan, it has a death rate only 10 per cent.

Prior to 1929 pernicious anemia, commonly termed a deficiency in the quantity of blood or its constituents, was treated with leeches, with patients living an average of only two or three years," he declared.

The use of liver and liver extracts became a part of the treatment developed since that time to combat the high death rate.

Trying Novel Experiment

Modern Housing Plan Is Becoming Popular In Chicago

Under direction of a foundation established by the late Marshall Field, a group of people are trying a novel experiment in modern city building being conducted in Chicago.

It is a five-story apartment building, covering two blocks, and making it possible for tenants a unique combination of community life that includes care and training of children by teachers and nurses.

Priced to attract tenants of average means, the building contains 300 apartments, stores, restaurants, beauty shops, and a community hall all are included in the building.

It is a five-story apartment building, covering two blocks, provides room for a flower garden, arbors and fully-equipped playgrounds for children from one to twelve years of age.

The most popular innovation, however, is a well-devised dental clinic which is open to all tenants. A clinic room for primary instruction is provided. Also there is a nursery where mothers may leave their children all day.

In addition to the usual school subjects, musical and dramatic training is provided for children, inclined toward these arts. Industrial and vocational training likewise is provided.

Angela Patri, noted authority on appendicitis, recently said: "I have dreamt of such a scheme for years. I tried to sponsor such a plan in New York, but my plan was rejected. I sincerely hope your pioneering effort will succeed with certainty."

Advice For Canadian Dairy Cow Exporters

Tag Giving Necessary Information Would Be Financially Beneficial

In the export of Canadian dairy products to the United States, buyers and importers will benefit financially, says W. A. Wilson, animal products trade commissioner for Canada in Great Britain. If a separate statement of the export of Canadian dairy products is issued, it will benefit the importers in which is listed the exact number of each cow and the approximate freshening date. Buyers want cows that will freshen shortly after arrival and will pay somewhat more for a cow that is determined to be head first. Payment in the total absence of this information, bargaining on all sales, except in evident cases, proceeds on assumption that the freshening date is approximately the same as the day of arrival.

"If a cow is head first, the buyers will pay less. The importers who are supplying the liquid milk trade and who must have a nearly full supply, emphasize this point particularly. They may even decline to purchase cows when they are told that they are head first. The cost of freshening time is doubtful.

It is very desirable, therefore, that shippers, even at some inconvenience, take the necessary precautions to remove that doubt, and thus give the importers the advantage of bargaining with certainty."

Cleansing Milking Machine

Weak Lye Solution For Rubber Parts

Additional work at the Dominion Division of Agricultural Bacteriology on the use of weak lye solution of 0.4 to 0.5 per cent. for the treatment of milking machine rubber parts shows that much greater efficiency can be obtained with this lye treatment following a cold water suction rinse, eliminating the use of hot water. This represents the simplest and cheapest treatment for milking machines yet devised. Tests indicate that lye has a very pronounced specific germicidal action on the kinds of bacteria which are responsible for many defects in milk and dairy products.

"Some men have been found to fail because they are prone to dawdling, indecision, worrying, or forgetting."

"A man is bound to fail if he has no definite plan, and if he does not know how to approach his problem, cannot take a robust good-naturedly, does not possess confidence, and if he is too long-winded in his conversation so that people tire before he is through."

Success or failure in life also depended to a great extent upon the kind of partner in marriage, Holland continued.

"Some like the clinging wife, the nagging wife, the domineering wife, and the dull-witted wife who is something of a milstone around her husband's neck."

"There is bound to be failure when the husband, married to a woman who is an effeminate youth, who is an independent and courageous man marries a helpless stupid woman; and an athletic, vigorous woman marries a doped-up book worm."

"Your husband told me his husband was at the bottom of the house," she said.

"Oh yes? Well, it's one of those laws that's never enforced."

Greater Revenue Is Obtained By Provinces By Increased Cost Of Motor Vehicle Registration

Why Some Men Fail

Various Reasons Why So Many Do Not Make Success Of Life

Various reasons why some men become failures in life were given by Dr. Bernard Hollander, noted physician, speaking at a meeting in London, England, of the South African Society of the Jewish Ethical Society.

They ranged from sheer laziness and overweening ambition to the handicap of a bad marriage—the wife who is a millstone round her husband's neck.

"If a man fails," said Dr. Hollander, "if his ideas are larger than his purse; if he trusts untrusting people; if he is too much of a 'goat' or too much of an animal; if he does not do today what he can be expected to do tomorrow; and if he risks all until tomorrow; and if he risks all his eggs in one basket when he is not in a position to catch them."

"Some men are bound to fail because they are prone to dawdling, indecision, worrying, or forgetting."

"A man is bound to fail if he has no definite plan, and if he does not know how to approach his problem, cannot take a robust good-naturedly, does not possess confidence, and if he is too long-winded in his conversation so that people tire before he is through."

Success or failure in life also depended to a great extent upon the kind of partner in marriage, Holland continued.

expanding for several months.

"Your husband told me his husband was at the bottom of the house," she said.

"Oh yes? Well, it's one of those laws that's never enforced."

Revenues collected by the provinces from registrations of motor vehicles, operators, etc., for 1932 amounted to \$21,126,271, as against \$19,654,908 for 1931, according to figures issued through the Dominion Bureau of Statistics.

"Revenue," the Bureau reports, "was an increase of \$1,441,363, or 7.2 per cent. and was all made in Ontario and Alberta."

The provinces made increases of 1.2 to 22.20 per cent. respectively, by increasing the rates. All the other provinces collected smaller revenues, ranging from 4.41 per cent. for New Brunswick to 9.76 per cent. for Prince Edward Island. Although Alberta raised the average passenger rate by 50 per cent. at \$9.48 per vehicle it is still the lowest of all the provinces.

"The provinces, except Quebec and Alberta, raised the gasoline tax during the spring of 1932 and Quebec made a raise in December, 1931. New Brunswick, Manitoba and British Columbia raised it from 5 to 7 cents and the other provinces increased their rates to 5 cents. The gasoline tax in Ontario was reduced and raised the gasoline tax revenue by \$4,537,197, or 21.20 per cent; or from \$22,548.19 in 1931 to \$27,088.316. Quebec increased its gasoline tax gross revenue of \$2,600,814 and Quebec followed with an increase of \$5,013. In Saskatchewan the reduction in consumption almost offset the increase in the rate and the revenue of \$1,923,051 for 1932 was \$1,891,000, or 1.8 per cent. This revenue is gross, including commissions paid to gasoline distributors for collecting and forwarding the tax to the provincial authorities and also the expenses of the provincial offices are not deducted."

Metal Furniture In England

At Its Lowest Popularity

Cabinet makers, whose industry is widely established in the outskirts of London, view with some alarm the rapidly increasing popularity of metal furniture in homes and office equipment. The tremendous increase made by metal workers during recent months in production of elegant and by no means expensive household furniture is manifested as an exhibition now on at the furniture and metalware department of a furniture establishment in Tottenham Court Road. The exhibition is said to prove that modern metal furniture offers all, and especially, more of the comfort and elegance design helps to only which is wood. In new furniture steel, chromium, and a new luminescent alloy of palest golden hue, is bent into flowing curves to form easy chairs and the bases for dining and "ecclesiastical" chairs. Cabinet-makers, however, say they are not popular.

The new furniture is so modern that it can be used only where modernism has inspired the architects of the houses and flats in which it is to be placed.

Collection Of Historic Shoes

Interesting Exhibit In New York

The "Shoe Show" in New York City, now in its second year, has been an interesting exhibit of historic shoes.

The first year the exhibits were limited to the period of 1800 to 1900. This year the exhibits are from 1800 to 1932.

Only three pairs of the historic shoes belong to men—the shoes of Ruby Keeler, Marilyn Miller's blue satin pumps and those worn by Irene Castle at her premiere in 1931.

Other exhibits include a pair of shoes owned by Herman D. Hoffman, New York, and placed on exhibition in the show salon of a Fifth Avenue store.

Trying To Check Growth

Because he is six feet, eight inches tall and weighs 250 pounds, Willard Akin, a popular student at a junior high school, is undergoing treatment to curb his growth. Akin, who was recently elected head boy by fellow-students at the school, is taking injections of a hormone which are taken from the frontal lobe of the pituitary gland under the direction of a Denver medical expert.

Canada Buys Mangos

Canada is developing trade with St. Lucia, British West Indies, and Canada. Grafted mangos are wrapped in paper on which instructions are printed as to how the fruit should be eaten.

HITLER PLEADS FOR RETURN OF COLONIES

A report emanating from Berlin stated that Chancellor Hitler has made a plea for the return of the German colonies which were captured by the Allies during the Great War. These colonies, which are now British possessions, while the small area shaded with vertical lines is now French property. There are several small islands in the Pacific which were taken from Germany and which she would like returned.

Soviet Russia sent five military aeroplanes as a gift to Turkey on the occasion of the republic's 10th anniversary.

A student objecting to military drill because he opposed war, won exemption for the first time in University of Minnesota history.

Chinese Legation of Nations central opium board decided not to include Manchukuo in countries to which forms will be sent for an estimate of needs of narcotics.

Ambassador Naotake Sato denied rumors Japan was collecting in Germany's ports grain, probably withdrawing from the disarmament conference.

At Agassiz, E.C., a White Leghorn pullet, 10-L, attained a price in Germany's ports of 100 francs per 300 eggs in 360 days, a record.

Deposited the egg which enabled her to equal a world egg-laying record.

The British empire is an example to the world that co-operation for positive ideals is possible between the most free and the most controlled. J. H. Thomas, secretary for a time to a speech at London, England.

David M. Linn, second year science student at McGill University, has been awarded the Robert Bruce Scholarship for one year and has a sum of \$100. It was announced at Montreal.

Veteran of three campaigns in Africa and also of the Great War, Sergeant Major James Robinson, D.C.M., one of the best known figures in Canadian sports, died in Vancouver on the eve of his 75th birthday, following a stroke.

Since the British Empire trade pact, formed at Ottawa imperial conference, had come into effect, Canada's trade with the empire had increased \$315,000,000. According to Hon. H. H. Stevens, Minister of Trade and Commerce.

His Majesty the King hopes to deliver for the second time a Christmas Day message of good will and encouragement to the people of the empire by radio, Dec. 25. He spoke for several minutes last Christmas from the ground floor apartment at Birmingham Palace.

Due To Public Sentiment

Cruelty To Dumb Animals Becoming Thing of Past

The day of the cruel steel trap is doomed. This represents to any person permitting it all decent men and women will, sooner or later refuse to use it. Time has cut out of the status of books of many a state and nation their sanctions of even greater cruelty.

A few years ago no one thought a law could be secured in Massachusetts to prohibit the use of the steel trap of dogs ears and now Pennsylvania has followed with a similar law. Public sentiment made possible the law. It will yet deal with the torturing steel trap in the same way.—Our Dumb Animals.

ALL YOU'LL NEED IS ABOUT
ONE HOUR OF YOUR TIME TO
MAKE THIS DARLING
DRESS

Delightfully fresh and simple is the
pretty little dress patterned here—
perfect for too.

It is a simple plaided gingham, so
smart and sturdy for small people.
The collar is white piping. It will tub
turn and the piping will turn to the
bitter end.

Note the French yoke; this new
design is a good idea; that lend plenty
of freedom for active youngsters.

Linen, cotton, rayon, jersey,
woolens, prints and wool jerseys
are other nice ideas.

Size No. 40 is designed for sizes
2 and 3 years. Size 4 requires 1 1/2
yards of 36-inch material with 1/2
yard of piping.

For pattern 20 cent in stamps
or coin (coin is preferred.) Wrap cold
carefully.

Recipes For This Week

By Betty Barclay

PASTI DI FRUTTA

Here is an unusual and delicious
fruit candy, which is also very simple
to make.

1 cup orange juice.
1/2 cup fruit pectin.
1/2 cup light corn syrup.

Congeal seedless oranges for this
recipe so that the unstrained juice
carrying some of the fruit pulp may
be used. Combine ingredients and
cook stirring frequently until mixture is of
the same consistency. Pour into a
straight-sided pan. When cold cut
into cubes or other desired shapes.
Roll in powdered sugar.

PUFF PUDDING

1/2 cup butter.
1/2 cup granulated flour.
2 cups sugar.

6 tablespoons grape-nuts.

4 eggs white, well beaten.

2 cups milk.

1/2 cup grated rind 2 lemons.

1 egg white, stiffly beaten.

Cream butter and sugar thoroughly.

Blend in eggs, flour, grape-nuts,

milk, lemon juice, and rind. Fold in

white cream. Pour into a well buttered

pan, about 12x16x2 inches. (Preheat
oven to 350 degrees F.)

Bake 50 to 60 minutes. When done

putting will crust on top, jelly
below. Serve hot or cold with plain or
whipped cream.

In his will a Graveston wheel-
wright expressed big wish to be buried
in a violet-colored coffin.

England's largest carton, consist-
ing of 23 boxes, has been installed on
a private estate near Chobham.

Panama has a new movement ad-
vocating lower import tariffs.

Whether it's marriage or business,
patience is the first rule of success.

**Saskatchewan Has Lowest
Tuberculosis Death Rate**

Reduced From 43.5 to 30.1 Per 100,000 of Population Since Inauguration of Preventive Work and Free Treatment Four Years Ago—Christmas Seal Supplies Funds For Preventive Work by Which Cases Are Discovered in Early Stages Making Recovery More Certain and Reducing Peril of Treatment and Cost to Taxpayers.

Slowly but surely Saskatchewan is gaining in its fight against Tuberculosis. In 1925 the death rate from Tuberculosis in this province was 30.1 per 100,000 of population. This has been 29.1 in 1926, 28.1 in 1927 and 27.1 in 1928. Last year the death rate was 26.9 per 100,000 population.

In 1929, when free treatment was first started in the province, the death rate in Saskatchewan was 43.5 per 100,000.

The reduction of the death rate from this preventable disease by more than 23 per cent in less than four years is a remarkable testimony of the value and necessity for continuous preventive work.

The Christmas Seal campaign for Preventive Work has been examined at the expense of the Christmas Seal Fund. Out of 100,000 of the money received from the campaign, 10 per cent was spent on the prevention of tuberculosis.

The prevention of Tuberculosis is still the greatest single cause of death in the province for the past 10 years. There were last year 251 deaths from Tuberculosis in Saskatchewan. Tuberculosis is by far the greatest killer of the province.

The campaign against Tuberculosis has been a success. The disease classified as infectious is this year receiving a cure for more than one-third of all cases.

Chinese Used To Delays

**News Of Great Catastrophes In
Oriental Travels Shown**

News of great natural calamities travel slowly in China. The first accounts of the great earthquake of 1927, which leveled mountains and plains in Kansu, took too long to reach the central provinces still many weeks after the disaster, though the shock rocked cities so wide apart as Tientsin, Hankow, and Canton. The result is that people are slow to learn of the disaster, and that knowledge of the Szechuan disaster should have been given long delayed in coming to the world. Kansu is a world apart, connected only by caravan routes across the most remote and least inhabited territories. The Min River, on the other hand, is an important tributary of China's great artery of communication, the Yangtze. It seems almost impossible that the disease classified as "infectious" in this country, accounts for more than one-third of all deaths from the endemic and infectious diseases.

The great need for Preventive Work is still the greatest single cause of death in the province for the past 10 years. There were last year 251 deaths from Tuberculosis in Saskatchewan. Tuberculosis is by far the greatest killer of the province.

ARE YOU TROUBLED WITH NERVES?

Do you find it hard to sleep at night? Do you feel poorly rested in the morning? "jumpy" all day, and "ragged" at night?

Then take Wincarsin. Here's a delicious wine, not a drug, that soothes nerves in nothing else that helps you sleep to the bone. It refreshes the whole being with vibrant new energy. Wincarsin brings you all the valuable elements of grape juice, the highest grade of fruit and guaranteed malt extract. Almost as soon as you begin to take it you feel better. It is wonderfully better. This is because Wincarsin enriches your blood, restores your energy, creating reserves of strength and energy.

Over 20,000 medical men have proved in cases of jumpy nerves, insomnia, anemia and general and individual indisposition that Wincarsin is your drug—Sales Agents: Harold F. Ritter & Co., Ltd., Toronto.

OPTIONAL WIFE

By EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful, commercial artist, and Peter Anson, a struggling sculptor, meet in an art class and fall in love. Camilla is the adopted daughter of a wealthy family, but is not to share in their fortune. Peter is a poor boy. They are faced with the problem of "marriage or career." And Camilla does not want to tie Peter down. But he has so much promise as a sculptor. At art school Camilla's good friend, Mrs. Hoyt, is jealous of Peter's success, takes Camilla to see the Hoyts and "tells them what she should know about Peter." Gus, who loves Camilla, is a chisel and a scoundrel. He is glad that he, Gus, loves her himself. At that moment Peter appears on the scene. He is a bit of a dandy, but the way home from the party Camilla tells Peter they are going to do something. She is not sure what it is, but she decides that they are to be married, and until Peter establishes himself, go on living with him. Peter accepts. Peter's protest she carries her point. Gus leaves Peter, and Peter and Camilla are free to marry and make happy. They decide not to tell Mrs. Hoyt, who wants to see Camilla marry married.

(Now Go On With The Story)

CHAPTER XVI

Camilla and Peter were married with a legal ceremony, witnessed by two strangers who were official attaches of the justice, on the Saturday following his graduation from National.

Peter had insisted upon renting an automobile and buying his bride a corsage of white flowers, and Camilla had protested at first, but after all, they only could be married once. Any other luxury which they might deny themselves now could be compensated in the future, but they had to be married now, and Camilla had insisted.

"I hope you never will be," he declared solemnly.

"Oh, Peter, it was so tragic. You act as if we were terribly serious. I am happy, and Camilla is happy. I hope you will be happy."

"I hope you never will be," he declared solemnly.

"I hope you never will be," he declared solemnly.

"I hope you never will be," he declared solemnly.

"I hope you never will be," he declared solemnly.

"I hope you never will be," he declared solemnly.

"I hope you never will be," he declared solemnly.

"I hope you never will be," he declared solemnly.

"I hope you never will be," he declared solemnly.

"I hope you never will be," he declared solemnly.

"I hope you never will be," he declared solemnly.

"I hope you never will be," he declared solemnly.

"I hope you never will be," he declared solemnly.

"I hope you never will be," he declared solemnly.

"I hope you never will be," he declared solemnly.

the peace and hearing Peter's deepest reply there beside her, Camilla heard in her imagination the muted strains of organ music and reverent phrases, felt the invisible presence of admiring friends, inhaled the fragrance of many flowers, and was uplifted by nothing from Peter's one little bouquet. A single white orchid that had cost five dollars, nestled in the surrounding mist of white stevia leaves, was very delicate, however, and had flaunted their beauty, but because it was the gift of this man who was pledging his love to and cherishing her until death did them part, Camilla was more pleased to receive it than all the flowers in the world. It seemed to represent to her what Peter wanted to do and could not do for her now, but promised to her in the future. Like their faith, said others, it was not established in the majorities of the flowers; rather, its singular beauty was accented by its more common surroundings.

Peter had sat a few minutes until Camilla had seated the little closed circle of gold hair over her finger and kissed her with as tender possession as if it were a confessional. She had witnessed the declaration—and they were man and wife.

They took hands with the witnesses, and Camilla recited some platitudinous phrases of congratulation, papers were signed, the very nominal fees paid, and they were out on the street happy, bewildered and a little wistful with the realization of the sudden transition from inertia into life.

They entered the waiting automobile and Peter directed the driver, "out the boulevard to University," and the young couple, in a daze, a drowsy daze, at Chancery Court, near the dinner at Chancery Court, said Camilla had said, "I like that because that is where we first met. It's a duck of a place, anyway. I always loved it there. At that moment Peter appeared on the scene, and he was exactly, and perhaps it will be the charm for our future happiness."

The June day justified its reputation for being something of a bore. The boulevard was a riot of flowers and vivid new greens of early summer. Tree branches curved and met to form shaded cloisters and rose ramadas everywhere with perfectly aligned. A single beam of sunlight seemed to hang between the sky and earth, sentient with sound and color and fragrance.

Camilla's hand slipped into Peter's, their fingers entwined and met, with obvious to everything around them.

"Sorry it's over?" he asked anxiously.

"Why, of course not. There never was a happier bride than I am. Peter, I hope you will be happy."

"I hope you never will be," he declared solemnly.

"I hope you never will be," he declared solemnly.

Married Peoples' Club night on Monday

Dr. and Mrs. A. K. McNeill and Mrs. McNeill, sr., left on Monday on a trip to Calgary

A wedding anniversary party was held at Social Plains on Friday, the honored guests being Mr. and Mrs. A. B. Silverthorne.

A surprise birthday party was held at the home of Mr. and Mrs. J. J. Muza on Thursday of last week.

Dave Lush made a trip to Alaska, on Tuesday. He was accompanied by Martin Nelson, who has gone to Winnipeg on a visit to his parents.

Next Sunday evening, the address at the United Church will be on the "Call of the West." Rev. A. J. Law, preacher. A cordial invitation is extended to all persons to attend.

Joe Anderson, left on Wednesday night for Saskatchewan pointe, with a shipment of some twenty head of horses.

This week Canada mourned the passing of Sir Arthur Currie. Fitting reverence and due homage was paid to the memory of a great leader and soldier.

A change to colder weather this week has afforded the curling club members an opportunity to get the sheets of ice ready and prepare for the season's games. The first game was played on Wednesday.

Mrs. Vera Lyster, left this week for Brandon, Manitoba, where she will spend the Christmas holidays with her grandmother, Mrs. Allen. Her mother accompanied her on the traiu journey as far as Swift Current.

We draw attention of readers to the "Health" article contained in this week's issue. It contains information in connection with foods, which may be found of value.

Burning of thistles alongside of the roads in town this week was a needed job, which citizens generally were pleased to see done.

Family Herald and Weekly Star and the Empress Express, both papers for one year. The two for \$2.25. See us for your subscriptions to other papers and magazines or clubbing offers. Use these for Christmas presents.

Miss Betty Duff was home over the week end visiting with her parents.

Orders for hand-knitting, sweaters, hats and children's things. Prices reasonable—Mrs. K. I. Spence.

Congratulations are due to Mr. T. C. Rogers who celebrated his 82nd birthday, Monday, December 4th. He was born at Rockville, Ont., December 4, 1851.

The regular monthly meeting of the Empress Chapter of the I.O.D.E., will be held at the home of Mrs. A. York, on Tues. December 12th, at 3 p.m.

Rev. J. P. Horne was a visitor to Custer this week. It is expected that some time in the near future he may be placed in charge of the Anglican Church at that point.

A surprise birthday party was held at the home of Mr. and Mrs. J. J. Muza on Thursday of last week.

Dave Lush made a trip to Alaska, on Tuesday. He was accompanied by Martin Nelson, who has gone to Winnipeg on a visit to his parents.

When it is realized that disease, disease and even death may follow upon the use of food, it becomes obvious that as we are all frequent and regular users of food, we should be informed on this subject.

We might begin by correcting a common misunderstanding. There is no such thing as ptomaine poisoning, as the term is commonly used. There are ptomaines, and they are poisons, but they are not found in food which can be eaten. Ptomaines are produced in the late stages of putrefaction, when food is in such a condition that no one would eat it.

It is well known that, at certain seasons, some fishes and animals are unwholesome. We know that there are some poisonous vegetable foods, such as in the group of mushrooms and other fungi.

The real danger to us, however, comes from foods which, in themselves are perfectly harmless, but which may and do become dangerous if they are contaminated by certain bacteria or germs. Some changes in foods, which result from the action of germs, are desirable, such as the souring of milk, the making of cheese and sauerkraut. The effects of a few germs are harmful and dangerous.

Botulism is a form of food poisoning which fortunately, is rare, because it is deadly. It is caused by the poison that is given off by a germ. In this country most cases have resulted from the use of home-canned vegetables, where, in the canning process, sufficient heat has not been used to sterilize the food or destroy the germs. This poison is readily destroyed by heat, and if these canned foods are boiled before being used, they are rendered safe.

The common form of food poisoning, which begins with nausea, abdominal pain, and

vomiting and diarrhoea, and which is popularly, but erroneously known as ptomaine poisoning, is seldom fatal. It is caused by the action of any one of several germs which are related to the germ of typhoid fever. As a rule, it is due to the careless handling of food or to improper cooking.

There is no danger in fresh fruits or vegetables. Cooked foods should be kept cold or hot; they should not be allowed to stand any length of time at a joke-warm temperature, as that offers germs an excellent chance to grow. Foods which do not look right, or that have a peculiar or unusual taste or odour, should be avoided. Game food should be boiled before being used.

Survey of Grain Cond.—cont.

1,820,000 bushels as compared with 1,610,000 bushels a week ago; and 1,880,000 bushels for the corresponding week of last year. Now wheat is commencing to move from the early

harvesting districts. No new estimates of this year's wheat crop were made during the week and from what information there is to hand, it does not appear that the yield will exceed 150,000,000 or some 60,000,000 bushels smaller than the final estimate for last year.

Exports of wheat and flour from Argentina amounted to 1,344,000 bushels, of which a substantial portion was shipped to non-European countries. Crop conditions are spoken of favorably. The feature of the Argentine news was the announcement on Tuesday of the appointment of a Commission to handle the exports of grains. Cable advises indicate that this step was taken to give the Government still further control of their peso exchange dealings. It is stated that the grains will be sold at world prices and that the foreign currencies obtained will be used for some time past peso exchange operations have been under government control and

large amounts of private export obligations have been imposed.

South Russian shipments in the aggregate, were somewhat smaller than a week ago. The totals were, Wheat, 1,024,000 bushels; Barley, 437,000 bushels; Ry, 298,000 bushels; Oats, 390,000 bushels. As usual, there was no particular news reported during the current week.

The American winter wheat crop is being reported as in a sub-normal condition owing to the lack of moisture in many important areas of the West.

Navigations at Fort William and Port Arthur practically closed for the season today, with the clearing of twelve grain boats, carrying slightly over two million bushels of grain. It is expected that very little grain will be moved east between now and the actual close of navigation on the Lakes, which is usually around December 12th to 15th. Stocks of grain at eastern Bay ports and seaboard are heavy and

more than ample to supply possible export demand between now and the opening of navigation on the Lakes next spring.
